

## Ideas Plots

## Categorize

- 1, 4 - for salary visualization
- 2, 3 - for trends

Can combine 1, 2, 3 to visualize the complete graph using number

- 5 - Used to point the jobs
- 6 - for salary overview
- 7, 8 - To display Covid 19 cases

## Filter

- To visualize the average salary of jobs in a country, bar chart looks better and simple.
- Line chart shows the trends of salaries for a particular jobs comparing with countries.
- Maps display the Covid cases in each country. Network map can be used to point out the jobs & salaries and also the Covid cases using color map.

## Combine & Refine

- 1, 2, 3 to be combine for representing completely.
- This will be based on whether the x-axis years, jobs, country

## Question

- Can users able to filter the country & year show data?
- Does the map enable the users to pop up the tooltip ~~chart~~ ~~map~~ ~~data~~ ~~information~~?
- How the mode of work was affected with Covid 19?
- Can users see the overview report of each country?

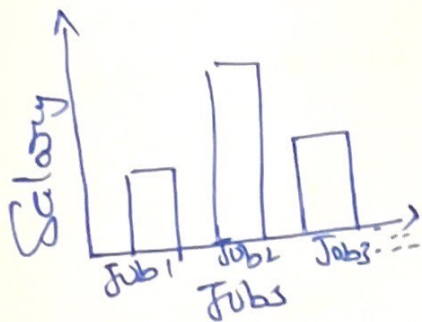

# Layout Scope & Salaries of IT roles

Choose the Country

options ▼

Choose the year

options ▼

Focus

→ Y-axis representing the Salaries (Avg)

→ X-axis representing the job role

Each Pie representing the Salary of a job role
